

# CARMIGNAC PORTFOLIO CREDIT F USD ACC HDG

LUXEMBOURG SICAV SUB-FUND

Recommended minimum investment horizon:

3 YEARS

LU2020612904

Monthly Factsheet - 28/02/2025

## INVESTMENT OBJECTIVE

Carmignac Portfolio Credit is an international fixed income UCITS that implements credit strategies across the globe. Its flexible and opportunistic style enables the Fund to implement an unconstrained and conviction-driven allocation. The fund aims to outperform its reference indicator over a minimum recommended investment period of 3 years.

Fund management analysis can be found on P.3

## PERFORMANCE

Past performance is not necessarily indicative of future performance. Performances are net of fees (excluding possible entrance fees charged by the distributor).

## FUND MANAGEMENT ANALYSIS

### MARKET ENVIRONMENT

- In the US, the labour market continues to show strength, with the unemployment rate falling to 4.0%. At the same time, inflation has risen to 3.0% year-on-year.
- Politically, Trump has begun to implement his programme, starting with an increase in tariffs on Mexico, Canada, China and Europe, which is expected to come into effect in the coming months.
- Talks on a ceasefire in Ukraine have also begun, with Trump engaging in negotiations with Russia for the first time since the war began in 2022.
- In the eurozone, inflation rose in January on the back of higher energy prices, while core inflation remained stable at 2.7%. Growth momentum improved slightly, with Q4 GDP revised up to 0.0% and the composite PMI rising to 50.3 thanks to a recovery in the manufacturing component.
- Interest rates fell in February, particularly in the US, where the 10-year rate fell by -33 bp thanks to Donald Trump's announcements and leading indicators pointing to a slowdown, while the German 10-year rate fell more moderately by -5 bp.

### PERFORMANCE COMMENTARY

- The Fund delivered a positive performance in both absolute and relative terms in February, benefiting from the favorable momentum in the fixed income markets and our selection of securities.
- The latter once again made a positive contribution to the Fund's performance, particularly the main investment themes, such as financial bonds and the energy sector.
- We continue to benefit from the surge of new issuers on the primary credit market, which have attractive valuations.
- Finally, we maintain exposure to the collateralized loan obligation (CLO) segment, which performs consistently.

### OUTLOOK AND INVESTMENT STRATEGY

- We continue to focus on our main investment themes through a selection of high-yield bonds, energy, financial stocks and our selection of CLOs. · In addition, in this volatile environment, we are maintaining our credit hedging strategies for approximately 18% of the Fund's net assets, in order to protect the portfolio against the risk of further market disruptions, while focusing on alpha. · Indeed, after years of weakness due to abundant liquidity and low cost of capital, default rates are expected to rise to more normal levels, which we see as a catalyst that should create real idiosyncratic opportunities. · Finally, the high carry of the portfolio (over 6.3%) and attractive dispersion within the credit spectrum should mitigate short-term volatility and help to generate medium
- and long-term performance.

## GLOSSARY

**Active Management:** An investment management approach where a manager aims to beat the market through research, analysis and their own judgement.

**Bottom up investing:** Investment based on analysis of individual companies, whereby that company's history, management, and potential are considered more important than general market or sector trends (as opposed to top down investing).

**Credit cycle:** A credit cycle describes the different phases of access to credit by borrowers. It alternates between periods of easily accessible funds to borrow due to low interest rates and periods of contraction where lending rules are more restrictive and interest rates are higher.

**Forward financial instruments:** A forward contract is a customized contract between two parties to buy or sell an asset at a specified price on a future date. A forward contract can be used for hedging or speculation, although its non-standardized nature makes it particularly apt for hedging. Unlike standard futures contracts, a forward contract can be customized to any commodity, amount and delivery date. A forward contract settlement can occur on a cash or delivery basis.

**High yield:** A loan or bond rated below investment grade because of its higher default risk. The return on these securities is generally higher.

**Investment grade:** A loan or bond that rating agencies have rated AAA to BBB-, generally indicating relatively low default risk.

**Net asset value:** Price of all units (in an FCP) or shares (in a SICAV).

**Non-benchmarked:** Portfolio construction is a result of Fund manager views and market analysis with no bias to any benchmark.

**SFDR Fund Classification:** Sustainable Finance Disclosure Regulation (SFDR) 2019/2088. EU Act that requires asset managers to classify funds into categories, "Article 8" funds promote environmental and social characteristics, "Article 9" funds have sustainable investments as a measurable objective. In addition to not promoting environmental or social characteristics, "Article 6" funds have no sustainable objectives. For more information, please refer to <https://eur-lex.europa.eu/eli/reg/2019/2088/oj>

**SICAV:** Société d'Investissement à Capital Variable (Open-ended investment company with variable capital)

**UCITS:** Undertakings for Collective Investments in Transferable Securities.

UCITS funds are authorised funds that can be sold in any country in the EU. UCITS III regulations allow funds to invest in a wider range of financial instruments, including derivatives.

**Yield to Maturity:** Yield to Maturity (YTM) is the estimated annual rate of return expected on a bond if held until maturity and assuming all payments made as scheduled and reinvested at this rate. For perpetual bonds, the next call date is used for computation. Note that the yield shown does not take into account the FX carry and fees and expenses of the portfolio. The portfolio's YTM is the weighted average individual bonds holdings' YTM within the portfolio.

(1) of the amount you pay in when entering this investment. This is the most you will be charged. Carmignac Gestion doesn't charge any entry fee. The person selling you the product will inform you of the actual charge.

(2) We do not charge an exit fee for this product.

(3) of the value of your investment per year. This estimate is based on actual costs over the past year.

(4) of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the investments underlying the product. The actual amount varies depending on the quantity we buy and sell.

(5) when the share class overperforms the Reference indicator during the performance period. It will be payable also in case the share class has overperformed the reference indicator but had a negative performance. Underperformance is clawed back for 5 years. The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years, or since the product creation if it is less than 5 years.

(6) Please refer to the prospectus for the minimum subsequent subscription amounts. The prospectus is available on the website: [www.carmignac.com](http://www.carmignac.com).

## MAIN RISKS OF THE FUND

**CREDIT:** Credit risk is the risk that the issuer may default. **INTEREST RATE:** Interest rate risk results in a decline in the net asset value in the event of changes in interest rates. **LIQUIDITY:** Temporary market distortions may have an impact on the pricing conditions under which the Fund might be caused to liquidate, initiate or modify its positions. **DISCRETIONARY MANAGEMENT:** Anticipations of financial market changes made by the Management Company have a direct effect on the Fund's performance, which depends on the stocks selected.

**The Fund presents a risk of loss of capital.**
